LUMINA AFRICA
FOUNDATION

AWARENESS

Building Pathways to Opportunity.

Four focus areas, one goal: young people in Northern Uganda are not left behind in a world that is becoming digital.

OUR FOCUS AREAS

Health & Community Wellbeing

Promoting health awareness, so communities have reliable information and can make informed decisions.

Education, Skills & Youth Development

Learning, mentorship and skills for employment, entrepreneurship and active community participation.

Technology & Digital Inclusion

Expanding access to technology and building the digital skills young people need in today's economy.

Climate Resilience & Justice

Supporting climate awareness and justice initiatives where young people take the lead.

More than two decades of conflict disrupted schooling and livelihoods in Northern Uganda. Digital skills help a generation catch up.

Be part of the change.
